Def. Doc. 1400-A-4 Press Release Issued by the Department of State on September 14, 1937 Following a conference with the Secretary of State and the Chairman of the United States Maritime Commission, the President today issued the following statement: "Merchant vessels owned by the Government of the United States will not hereafter, until further notice, be permitted to transport to China or Japan any of the arms, ammunition, or implements of war which were listed in the President's proclamation of May 1, 1937.

"Any other merchant vessles, flying the American flag, which attempt to transport any of the listed articles to China or Japan will, until further notice, do so at their own risk.

"The question of applying the Neutrality Act remains in statu quo, the Government policy remaining on a 24-hour basis."

Def. Doc. 1400-A-5 The Department of State to the Japanese Embassy Reference is made to the note, No. 316, dated December 21, 1940, from the Japanese Embassy at Washington, in regard to restrictions recently placed on the exportation of iron and steel. It is noted that the Embassy refers to its notes of August 3, 1940, and October 7, 1940, in regard to the restrictions placed on the exportation of aviation gasoline and iron and steel scrap. The Embassy's attention is invited to the replies which the Department addressed to those notes on August 9, 1940, and October 23, 1940. The statements therein made concerning the interests of the national defense of the United States apply fully to the considerations raised in the Embassy's note under acknowledgment in regard to the recent restrictions on the export of iron and steel. not used Def. Doc. 1400-B-4 The Chief of the Office of Arms and Aunitions Control, department of State (Green), to 148 Persons and Companies Manufacturing Airplane Parts Washington, July 1, 1938 As some misunderstanding appears to have arisen as to the purport of the statement made by the Secretary of State in his press conference on June 11 in regard to bombing civilien populations from the air, I am addressing this letter in regard to the matter to all persons and companies registered as manufacturers or exporters of airplanes or aeronautical equipment. In view of the fact that the Secretary's statement definitely condemned bombing of civilian populations from the air, it should be clear to all concerned that the Government of the United States is scrongly opposed to the sale of airplanes or aeronautical equipment which would materially aid or encourage that practice in any countries in any part of the world. Therefore, in view of this policy, the Department would with great regret issue any licenses authorizing exportation, direct or indirect, of any aircraft, aircraft armament, aircraft engines, aircraft parts, aircraft accessories, aerial bombs or torpedoes to countries the armed forces of which are making use of airplanes for attack upon civilian populations. Should any manufacturer or exporter have already entered into contractual obligations, of which he finds it impossible to divest himself, to sell or export airplanes or aeronautical equipment, for which licenses have been issued or for which he has heretofore intended to apply for licenses, to any country which is engaged in bombing civilian populations from the air, it is suggested that he may wish to inform the Department of the terms of that contract before applying for licenses to export pursuant to it or before exporting under licenses already issued. Very truly yours, Joseph C. Green Pages 201, 202 Excerpt from FOREIGN RELATIONS OF THE UNITED STATES, JAPAN, 1931-1941, Vol. IL

Def. Doc. 1400-B-5

Executive Order No. 8631, Signed by President Roosevelt, January 10, 1941

Pursuant to the authority vested in me by the provisions of section 6 of the Act of Congress approved July 2, 1940, entitled "An Act to expedite the strengthening of the national defense," I her soy prescribe the following additional regulations governing th exportation of: .

> 2. Copper

Brass and Bronze

Zine 3.

Nickel

Potash

pursuant to the provisions of section 6 of the Act of Congress approved July 2, 1940, and in these regulations, the above articles and materials shall be construed to include:

> A. Copper: Ore, concentrates, mette, and unrefined copper including blister, black or coarse, converter, and anodes. Refined copper in bars, billets, cakes, ingots, slabs and other commercial shapes Old and scrap copper Pipes and tubes Plates and sheets Rods Wire:

> > Bare Insulated wire and cable: Pubber-covered wire Weatherproof wire Cther insulated wire Other primary fabrications Facrications for munitions purposes Alloys, other than brass and bronze

B. Brass and Bronze: Sorap and cld Ingots and other commercial shapes Bars and rods Plates and sheets Pipes and tubes Wire (bare or insulated) Other primary fabrications Fabrications for munitions purposes

Zinc: Ore, concentrates, and dross Cast in slabs, plates, or blocks Rolled in sheets and strips Other forms including scrap Alloys Dust Manufactures containing 20% or more zinc D. Nickel:
Ores, concentrates, and matte
Metal in any form including ingots, bars, rods,
sheets, plates and scrap
Alloys containing 10% or more nickel including scrap
Nickel compounds (chemical) containing 10% or more
nickel

E. Potash:

Potassium Salts and Compounds

Potassium hydroxide (KOH)

Potassium carbonate (K₂CO₃)

Potassium Chlorate (KCHO₃)

Potassium perchlorate (KCHO₃)

Potassium cyanide (KCN)

Potassium iodide (KI)

Potassium nitrate (KNO₃)

Potassium permanganate (KM₂C₃)

Potassium bicarbonate (KHCO₃)

Potassium bitartrate (KHC₄H₄O₆)

Potassium bitartrate (KHC₄H₄O₆)

Potassium chloride (KCl)

Potassium sulphate (K₂SO₄)

All other potassic fertifizer materials

containing 27% or more potassium oxide

(K₂O) equivalent

All combinations and mixtures of any of the foregoing containing potash salts of 27% or more potassium oxide (K₂O) equivalent

x x x x x x x x x x x x x x x x x

3. Regulation 1 of the Regulations issued July 2, 1940, pursuant to the Act of July 2, 1940, is modified only in so far as it applies to Copper, Brass and Bronze, Zinc, Nickel and Potash in accordance with the foregoing classification. Regulations 2 to 12 inclusive of the Regulations issued July 2, 1940, pursuant to the Act of July 2, 1940, are applicable to exportation of Copper, Brass, and Bronze, Zinc, Nickel and Potash.

Defense footnote: Commodity number omitted.

Trat up Def. Doc. 1400-C-4 Memorandum by the Secretary of State (Washington), January 6, 1940 The Japanese Ambassador called and handed me the attached notes, which are self-explanatory. I inquired whether he desired a written reply to the note in regard to moral sanctions, including an alleged contract between a Japanese company and American citizens concerning technical processes and manufacturing rights for the production of certain petroleum products. He said that the Japanese Government would like to have a written reply. I then remarked that he no doubt was aware of the fact that the so-called moral embargo on all phases of the airplane situation found its origin in and wes based on the bombing of civilian populations from the air in China by the Japanese, and that I would probably list a great number of these bombings as reported to this Government and allow them to be published together with the balance of the contents of the note. The Ambassador appeared very startled at this idea, and repeated the request of his Government for a written reply. With regard to technical processes for high-test gasoline, I stated that this Government, concerned as it is with the increase of war and the use or threat of force in so many parts of the world, feels constrained to conserve a number of the more vital interests it has in defense commodities or materials, and that this, together with our abhorrence of the bombings of civilian populations, is the basis for the conservation of the gasoline manufacturing processes to which the Ambassador referred. The Ambassador brought up the question of the violation by this Government of the Treaty of Commerce of 1911. I said, without going into the merits of the metter, that I trusted his Government would not forget how many times American commercial rights and interests have suffered injury in China contrary to all treaties and all law, and that notwithstanding this fact, this Government and others perhaps were expected to be perfectly quiescent while being deprived of their right to participate in economic and other undertakings in China, although the Japanese Government would expect to enjoy the benefits of the rule of equality in its economic dealing with all the Western world. I then added that, as I had heretofore stated to the Ambassador, the subject of commercial treaties was under discussion between Mr. Grew and the Foreign Office at Tokyo, and that we were deferring the entire matter to that discussion for the time being. The Ambassador had nothing further to say. The Japanese Ambassador (Horinouchi) to the Secretary of State

No. 2

Washington, January 6, 1940

SOY BENEFITS

Sir: I have the honor to state that, as the result of a communication through a circular letter of July 1, 1938, addressed by the Department of State to manufacturers and exporters of aircraft and aircraft parts, in which it was mentioned that "the Department of State would with great regret issue any licenses authorizing exportation, direct or indirect, of any aircraft, aircraft armament, aircraft engines, aircraft parts, aircraft accessories, aerial bombs or torpedoes to countries the armed forces of which are making use of airplanes for attack upon civilian populations," it has virtually become impossible for Japanese firms to import any airplanes and airplane parts of American make.

As repeatedly stated by my Government, military operations of the Japanese air forces in China have been directed solely against werlike organizations and establishments of the Chinese. No bombing or machine-gunning has been resorted to against civilian population as such. The Japanese Government, therefore, cannot but take exception to any treatment of Japan as a country "the armed forces of which are making use of airplanes for attack upon civilian populations."

The above-mentioned measures employed by the Department of State, which, in view of the great influence that can be wielded by a central government upon private manufacturers and exporters, have the effect of a discriminatory export embargo. My Government considers that such measures applied to Japan are in derogation of the provision of Article V, paragraph 3 of the Treaty of Commerce and Navigation between Japan and the United States of February 21, 1911, and at variance with the general purposes of the Treaty .s a whole.

While my Government was keenly alive to the unfortunate consequences of the said communication to American exporters, it did not relinquish the hope that the United States Government, in harmony with its fair and just brade policy, would before long retract it.

However, on December 16, 1939, another letter was addressed by the Department of State to manufacturers and exporters to the effect that the Department hoped that it would not receive any application for a license to authorize the exportation, direct or indirect, of articles enumerated in the letter of July 1, 1938, and, in addition thereto, of aeronautical equipment of all kind and materials essential to airplane manufacture. In order to point out that molybdenum and aluminum should be included among such materials, a letter was addressed by the Department to all producers of these two materials.

Still further, it was announced on December 20, 1939, from the Department of State that the decision had been reached that there should be no further delivery to certain countries of plans, plants, manufacturing rights, or technical information required for the production of high quality aviation gasoline and that this decision had been communicated to the interested American oil companies. The announcement cited the decision as an extension of the United States Government's policy in regard to the sale of

sirplane, aeronautical equipment, and materials essential to airplane manufacture to countries the armed forces of which were engaged in unprovoked bombing or machine-gunning of civilian populations from the air.

Of late there occurred a number of cases in which the purchase of certain articles and materials under negotiation between Japanese firms and interested American companies has been rendered impossible as the result of the Department of State's letters.

To cite one of the most outstanding cases, a memorandum of a contract was drawn and initialed August 19, 1938, by representatives of Japan Gasoline Company on the one part and Universal Oil Products Company on the other.

It was stipulated that Universal Oil Products Company, which since 1928 had maintained close business connection with Japan Gasoline Company, should grant a license in Japan covering their polymerization processes for the production of iso-octanes and rights under all of their processes in the entire petroleum field, in return for which Japan Gasoline Company should pay \$1,000,000 United States funds to Universal Oil Products Company.

It was understood that, during the progress of the negotistions in connection with the above agreement, the representatives of Universel Oil Products Company approached and laid the pertinent facts before the Department of State, which made no objection to the transaction.

Under the terms of the agreement Japan Casoline Company paid to Universal Oil Products Company a sum of .300,000 on October 30, 1938, and \$400,000 on July 8, 1939. It was agreed that further payment of \$100,000 was to be made at the time of delivery of plans and specifications for a plant and a final payment of \$200,000 upon completion and test of such a plant. In essence, Universal Oil Products Company was bound to guarantee, within the limit of the money it was to receive in payment, complete working of the plant in Japan under polymerization processes.

Recently Universal Oil Products Company proposed that a final agreement should be made along the lines of the provisional agreement, and accordingly the two parties continued their negotiations.

On December 19, 1939, however, Universal Oil Products
Company informed the representatives of Japan Casoline Company that
they had received a letter from the Department of State which left
no alternative for them but to withhold further fulfillment of the
terms of the contract.

The consummation of this contract, under which the greater part of the payment involved has already been made and other obligations required have been completely fulfilled by one of the parties, has for all practical purposes been frustrated.

ATMODAS . IN .

Executive Order No. 8669, Signed by President Roosevelt, February 4, 1941

Pursuant to the authority vested in me by the provisions o section 6 of the act of Congress approved July 2, 1940, entitled "An Act to expedite the strengthening of the national defense," I hereby prescribe the following additional regulations governing th exportation of:

Iron and Steel

1. As used in Proclamation No. 21,49 of December 10, 1940, issued pursuant to the provisions of section 6 of the act of Congress approved July 2, 1940, and in these regulations, the terms "iron" and "steel" shall be construed to include the following forms, conversions, and derivatives:

Iron Ore:

Iron ore

Ivon and Steel Semimenufactures:

Pig Iron

Iron and Steel Sarap:

No. 1. Feery melting steel screp (Category 2) Mc. 2 Heavy melting steel serap (Outegory 3)

Hydraulically coopressed and buled sneer surap

(Categories 7 & 8)

Cast and burnt aron scrap (Categories 1, 9, 10, 11, 15) Other (Categories 4, 5, 5, 13) (Includes heavy

shoveling sweet, scleoned rail screp, machine shop turnings, wire shorts, resolling rails, rejouts eto. !

Tin-plate scrap (Includes Fin-plate clippings, cuttingo stampings, trimmings, skeleton sheets, and all order wiscelloneous pieces of discerded tin plate, which result from the menufacture of tir. plate, and of tin-bearing orticles from ton plate) (Placed under export control, Executive Order, effective april

16, 1936)
Tin-plate circles, strips, cobbles, and scroll-shear butts

Waste-waste tin plats

Torneplate wante-waste, clippings, and sorep

Iron and Steel Products:

Steel ingots, blooms, billets, slabs, sheet bars, and timplate bars (Include ingot iron, and other iron made in steel-making furnaces):

Not containing alloy

Alloy steel, including stainless

Iron and Steel Bars and Rods (Include rounds, flats, squares, etc.)

Steel Bars, cold finished

Iron Bars

Concrete reinforcement bars (Include deformed and twisted)

Other steel bars, including drill rods, merchant bars, tool steel bars, and drill steel:

Not containing alloy

Stainless steel

Alloy steel other than stainless

Wire rods

```
Iron and Steel Plates, Sheets, Skelp, and Strips
     (Include waste and waste-wasteplate, sheet and strip):
   Plates:
     Armor plate, other than that listed in the
         President's Proclamation of May 1, 1937
     Boiler plate
     Other plates, not fabricated (Include hot and
         cold rolled)
       Not containing alloy
       Stainless steel
       Alloy steel other than stainless
   Skelp iron and steel (Consists of long strips used
        in the manufacture of pipes and tubes)
Iron and Steel, Galvanized:
   Iron Sheets
   Steel Sheets
Steel Sheets, Black, Ungalvanized, (Include hot and sold
   rolled):
   Not containing alloy
   Stainless steel
   Alloy steel, other than stainless
Iron Sheets, Black (Include material under 1/8" in
   thickness in 6033-6036)

Defense Footnote: Commodity numbers omitted.

Reference is made to your statement to the effect that the Universal Oil Products Company, upon the receipt by it of a letter from the Department of State, was left no alternative but to withhold further fulfillment of a provisional agreement with the Japan Gasoline Company, and in particular to your statement that the pertinent facts in regard to the proposed transaction were communicated to the Department of State by the Universal Oil Products Company during the progress of negotiations and that the Department made no objection. It is observed that the Department of State's informal indication of non-objection to the installation in plants in foreign countries of certain processes for the production of iso-octane fuel was given before the continued widespread bombing and machine-gunning of civilian populations in certain areas impelled the American people and this Government to extend the policy of condemnation of that practice to include the with-holding of delivery of technical processes for the production of high quality aviation gasoline from countries the armed forces of which are engaged in unprovoked bombing and machine-gunning of civilian populations from the air. Furthermore, the Covernant of the United States, concerned as it is with the increase and spread of war and the use or threat of force in so many parts of the world, has recently felt constrained to conserve vital interests which this Government has in certain commodities and technical processes relating to the national defense.

In view of the foregoing circumstances, the American Government is unable to agree that its action in inviting American exporters voluntarily to cooperate with the policy pursued by the American people and by this Government of condemning and

Executive Order No. 8693, Signed by President Roosevelt, February 25, 1941

Pursuant to the authority vested in me by the provisions of section 6 of the act of Congress a proved July 2, 1940, entitled "An Act To expedite the strengthening of the national defense," I hereby prescribe the following additional regulations governing the exportation of the articles and materials designated in my proclamation of February 25, 1941:

- 1. The articles and materials designated in my proclamation of February 25, 1941, pursuant to section 6 of the act of July 2, 1940, shall be construed to include the following:
 - (1) Belladonna:
 Belladonna Leaves, U.S.P. (Belladonnae Folium):
 Belladonna Plaster, U.S.P. (Emplastrum Belladonnae)
 Extract of Belladonna, U.S.P. (Extractum Belladonnae)
 Fluid Extract of Belladonna Leaf, N.F. (Fluid
 extractum Belladonnae Folii)
 Tincture of Delladonnae, U.S.P. (Tinctura
 Belladonnae)
 Belladonna Cintment, U.S.P. (Unguentum Belladonna)
 Belladonna Root, U.S.P. (Belladonnae Radix):
 Fluid Extract of Belladonnae Radicis)
 Belladonna Liniment, N.F. (Linamentum Belladonnae)
 - (2) Atropine:
 Atropine, U.S.P. alkaloid (Atropine, atropia):
 Atropine Hydrobromide
 Atropine Lydrochloride
 Atropine Methylbromide
 Atropine Methylnitrate
 Atropine Hitrate
 Atropine Balicylate
 Atropine Sulfate, U.S.P. (Atropine Sulfae)
 Atropine Julfuric Acid
 Atropine Velerate
 - (3) Sole Leather Bends, backs, and sides
 - (4) Belting Leather

× × × × × × × × × × × × × × × × × × ×

- 3. Regulations 2 to 12 inclusive of the Regulations issued July 2, 1940, pursuant to section 6 of the act of July 2, 1940, are applicable to the exportation of the articles and materials listed in paragraph 1 (1) through (4) inclusive.
- 4. Executive Order No. 8640 is hereby amended to include within its provisions the articles and materials designated in my proclamation of February 25, 1941.

Memorandum by the Secretary of State

(Washington, 7 November 17, 1941

I accompanied Ambassador Nomura and Ambassador Caburo Kurusu to the White House in order that the latter might be received by the President.

The President remarked that some time ago he proclaimed a zone around this hemisphere, 300 miles out in the sea in some places and 1,100 miles in others. The President added that this was self-defense.

Defense Doc. No. 1400-F-3

Excerpt from Foreign Relations of the United States, Volume II

Memorandum of a Conversation

(WASHINGTON,) December 2, 1941.

The Ambassador said that, while he did not wish to enter into a debate on the matter, he wished to point out that the Japanese people believe that economic measures are a much more effective weapon of war than military measures; that they believe they are being placed under severe pressure by the United States to yield to the American position; and that it is preferable to fight rather than to yield to pressure. The Ambassador added that this was a situation in which wise statesmanship was needed; that wars do not settle anything; and that under the circumstances some agreement, even though it is not satisfactory, is better than no agreement at all.

Def. Doc. 1400-F-4

STY P. N. Problemation No. 2413, Signed by President Roosevelt, July 2, 1940

WHEREAS Section 6 of the act of Congress entitled "AN ACT To expedite the strengthening of the national defense," approved July 2, 1940, provides as follows: but alnomak

"Whenever the President determines that it is necessary in the interest of national defense to prohibit or curtail the exportation of any military equipment or munitions, or component perts thereof, or machinery, tools, or material or supplies necessary for the manufacture, servicing or operation thereof, he may by proclamation prohibit or curtail such exportation, except under such rules and regulations as he shall prescribe. Any such proclamation shall describe the articles or materials included in the prohibition or curtailment contained therein. In case of the violation of any provision of any proclamation, or of any rule or regulation, issued hereunder, such violator or violators, upon conviction, shall be punished by a fine of not more than \$10,000, or by imprisonment for not more than two years or by both such fine and imprisonment. The authority granted in this Act shall terminate June 30, 1942, unless the Congress shell otherwise Armor plete, other than that listed in my

NOW, THEREFORE, I, FRANKLIN D. ROOSEYELT, President of the United States of America, acting under and by virtue of the authority vested in me by the said act of Congress, do hereby proclaim that the administration of the provisions of section 6 of that act is vested in the Administrator of Export Control, who shall administer such provisions under such rules and regulations as I shall from time to time prescribe in the interest of the national defense. Metal-working machinery for --

antine AND I do hereby further proclaim that upon the recommenda-tion of the aforesaid Administrator of Export Control, I have determined that it is necessary in the interest of the national defense that on and after July 5, 1940, the articles and materials hereinefter listed shall not be exported from the United States a except when authorized in each case by a license as hereinefter and materials the exportation of which is not already : Depigo and to

Executive Order No. 8694, Signed by President Roosevelt, February 25, 1941

Pursuant to the authority vested in me by the provisions of section 6 of the act of Congress approved July 2, 1940, entitled "An Act To expedite the strengthening of the national defense," I hereby prescribe the following additional regulations governing the exportation of the articles and materials designated in my proclamation of February 25, 1941:

- 1. The articles and materials designated in my proclamation of February 25, 1941, pursuant to section 6 of the act of July 2, 1940, shall be construed to include the following:
 - (1) Beryllium:
 Ores and concentrates (except gem varieties)
 Metal, alloys and scrap
 Beryllium salts and compounds
 - (2) Graphite electrodes
 (3) Aircraft Pilot Trainers
 Trainers for ground instruction of pilots,
 student pilots, and combat crews for aircraft in instrument flying, navigation, bombing,
 or gunnery.

- 3. Regulations 2 to 12 inclusive of the Regulations issued July 2, 1940, pursuant to section 6 of the act of July 2, 1940 are applicable to the exportation of the articles and materials listed in paragraph 1 (1) through (3) inclusive.
- 4. Executive Order No. 8640 is hereby amended to include within its provisions the articles and materials designated in my proclamation of February 25, 1941.

JUL 7 1947

ヨセフい ダブリユー・ ピーバ ーランタイン

Def. Doc. 1400-G-4

Press Release Issued by the White House on July 2, 1940

The President on July 2 signed H. R. 9850, providing legal authority for the control of exports from the United States of munitions, materials, and machinery essential to our national defense. A proclamation issued under this authority sets up the controls considered necessary at this time.

The items and materials listed in the proclamation include certain strategic materials as well as semi-finished products and machine tools of which there are actual or prospective shortages as a result of the national defense program.

x x x x x x x x x x x x x x x x x x x

The President also signed and issued the following military order:

"The administration of section 6 of the act of Congress entitled 'An Act to expedite the strengthening of the national defense', approved July 2, 1940, is essentially a military function, and by virtue of the authority vested in me as President of the United States and as Commander-in-Chief of the Army and Navy of the United States, I hereby designate Lieutenant Colonel Russell L. Maxwell, U.S. Army, Administrator of Export Control to administer the provisions of the said section under the direction and supervision of the President as Commander-in-Chief of the Army and Navy of the United States.

Memorandum of a Conversation

(WASHINGTON,) July 2, 1941.

Mr. Ballantine and Mr. Schmidt, who were later joined by Mr. Hamilton, called at the apartment of Colonel Iwakuro and Mr. Wikawa by arrangement lafollowing an intimation . . . that the Japanese would like to meet us for further discussion.

In a plea for mutual confidence, Mr. Wikawa stated that he had learned recently that the banking firm of Morgan and Company in New York, which had control of a Japanese sinking fund to purchase Japanese Government bonds at a price favorable to Japan, had learned from sources within the State Department that these conversations had been very politely but firmly and on technical grounds closed by the United States and that the freezing of Japanese funds in the United States could be expected in the near future. Morgan and Company had accordingly begun the purchase of Japanese Government bonds indiscriminately and had forced the price of those bonds to rise considerably to the detriment of the Japanese Government's sinking fund. Mr. Wikawa said they were embarrassed by an implication in the Secretary's oral statement of June 21 of division within the Japanese Government.

M(AX) W. S(CHMIDT)

51a Mr. Matsudaira was also present.

Regulations Governing the Exportation of Articles and Materials Designated in the President's Proclamation of July 2, 1940, Issued Pursuant to the Provisions of Section 6 of the Act of Congress Approved July 2, 1940

- 1. As used in my proclamation of July 26, 1940, issued pursuant to the provisions of section 6 of the Act of Congress approved July 2, 1940, and in these regulations, the following terms shall be construed as defined herein:
- A. Petroleum.Products -- (a) Aviation Motor Fuel, i.e. high octane gasolines, hydrocarbons, and hydrocarbon mixtures (including crude oils) boiling between 750 and 350° F. which with the addition of tetraethyl lead up to a total content of 3 c.c. per gallon will exceed 87 octane number by the A.S.T.M. Knock Test Method; or any material from which by commercial distillation there can be separated more than 3% of such gasoline, hydrocarbon or hydrocarbon mixture. (b) Aviation Lubricating Oil, i.e. any lubricating oil of 95 or more seconds Saybolt Universal Viscosity at 210° F. with a viscosity index of 85 or more.
- B. Tetraethyl Lead -- Pure tetraethyl lead, ethyl fluid, or any mixture containing more than 3 c.c. of tetraethyl lead per gallon.
 - C. Iron and Steel Scrap -- Number 1 heavy melting scrap.
- 2. Regulations Nos. 2 to 12, inclusive, of the regulation issued on July 2, 1940, pursuant to the Act of July 2, 1940, are applicable to the exportation of aviation motor fuel, tetraethyl lead, and aviation lubricating oil.

Proclamation No. 2423, Signed by President Roosevelt, September 12, 1940

WHEREAS section 6 of the act of Congress entitled "An Act to expedite the sirragehaning of the national defense," approved July 2, 1940, provides as follows:

(Here follows the text of the act as quoted in proclamation No. 2413 of July 2, 1940, printed on page 211).

NOW, THEREFORE, I, FPANKLIN D. ROOSFVELT, President of the United States of America, sating under and by virtue of the authority vested in me by the aforesail set of Congress, do hereby proclaim that upon the recommendation of the Administrator of Export Control I have determined that it is necessary in the interest of the rational defense that on and after this date the following described articles and materials shall not be exported from the United States except when authorized in each case by a license as provided for in Proclamation No. 2013 of July 2, 1940, entitled "Administration of scotion 6 of the set antitled 'An Act to expedite the strengthening of the national defense' approved July 2, 1940," and in the regulations issued pursuant thereto:

- l. Equipment (excluding minor component parts) which can be used, or adapted to use, for the production of aviation motor fuel from petroleum, petroleum products, hydrocarbons, or hydrocarbon mintures, by processes involving chemical change; and any plans, specifications, or other documents containing descriptive or technical information of any kind (other than that appearing in any form available to the general public) useful in the design, construction, or operation of any such equipment, or in connection with any such processes. Aviation motor fuel shall mean such fuel as is defined in the regulations issued pursuent to Proclamation No. 2417 of July 26, 1940, as may from time to time be emended.
- 2. Equipment (excluding minor component parts) which can be used, or adapted to use, for the production of tetraethyl lead; and any plans, specifications, or other documents containing Rescriptive or technical information of any kind (other than that appearing in any form available to the general public) useful in the design, construction, or operation of any such equipment, or in connection with any such processes. Tetraethyl lead shall mean such tetraethyl lead as is defined in the regulations issued pursuant to Proclamation No. 2417 of July 26, 1940, as may from time to time be smended.
- 3. Plans, specifications, and other documents containing descriptive or technical information of any kind (other than that appearing in any form available to the general public) setting forth the design or construction of aircraft or aircraft engines.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of the United States of America to be affixed.

DONE at the City of Washington this twelfth day of September in the year of our Lord nineteen (Seel) hundred and forty, and of the Independence of the United States of America the one hundred and sixty-fifth.

Memorandum by the Ambassador in Japan (Grew)

(TOKYO,) July 27, 1941.

* * * *

At this point the Minister again reverted to the resentment which was felt in Japan at the freezing of Japanese assets. I told him that I had little knowledge of the intention of my Government in regard to the administration of the Executive Order freezing Japanese assets but that I telleved, against speaking unofficially and personally, that there might be considerable flexibility in the administration of the Order. * * * * *

Def. Doc. 1400-J-4

Ry.

The Japanese Embassy to the Department of State

The Japanese Government has taken note of the Proclamation, dated July 26, 1940, by the President of the United States of America, for the administration of section 6 of the Act of Congress approved July 2, 1940, entitled, "An Act to expedite the strengthening of the national defense," and the Regulations, dated July 26, 1940, governing the exportation of articles and materials designated in the President's Proclamation of July 2, 1940, and the announcement of July 31 recommended by Colonel R. L. Maxwell, Administrator of Export Control.

The announcement of July 31, the introduction to which stated that it was issued with the approval of the President, is as follows:

"In the interests of the National Defense the export of aviation gasoline is being limited to nations of the Western Hemisphere, except where such gasoline is required elsewhere for the operations of American owned companies."

It is the understanding of the Japanese Government that the announcement expresses the policy to be followed by the Government of the United States in applying the above mentioned Proclamations and Regulations to the export of aviation gasoline and that that policy, by limiting the export destinations, is tentamount to an embargo on aviation gasoline so far as countries outside the Western Hemisphere are concerned. As a country whose import of American aviation gasoline is of immense volume, Japan would bear the brunt of the virtual embargo. The resultant impression would be that Japan had been singled out for and subjected to discriminatory treatment.

While reserving all rights of further action, the Government of Japan wishes to protest against the policy of the Government of the United States set forth in the announcement under review.

net weed Def. Doc. 1400-K-4 The Department of State to the Japanese Embassy.... The Government of the United States desires to state that the action under reference, as was mentioned in the proclamation issued by the President of the United States on July 26, 1940, referred to in the Japanese Embassy's note under acknowledgment, is necessary in the interest of the national defense and that, accordingly, this Government considers a protest by any foreign government against that action to be unwarranted. Def. Doc. 1400-M-4 Press Release No. 48 Issued by the Federal Loan Agency on September 25, 1940 Jesse Jones, Federal Loan Administrator, announced today that as a part of the National Defense program the Metals Reserve Company has agreed to buy from the National Resources Commission of China tungsten to the value of \$30,000,000. The tungsten will be delivered over a period of years at prices to be agreed upon from time to time, in accordance with market conditions, as the tungsten is delivered. To assist China to meet her present foreign exchange needs the Export-Import Bank has agreed to lend China \$25,000,000 that will be liquidated through the sale of the tungsten. The loan will be made to the Government of China with the guarantee of the Central Bank of China. December 15, 1938, the Bank authorized 25,000,000 credits to the Universal Trading Corporation of New York, a Chinese-owned American corporation, which is being repaid through the importation from China of wood oil, used in the manufacture of paints and varnishes. \$20,840,000 of this authorization has been drawn, and \$2,993,444 repaid. March 7, 1940, the Bank authorized additional loans to China of \$20,000,000 which is to be repaid through the importation from China of tin. Some tin is already being shipped. Of all loans heretofore authorized to China, both by the RFC and the Export-Import Bank, \$43,824,528 has been disbursed and \$13,160,253 repaid, with nothing past due. Press Release Issued by the White House on September 26, 1940

The President has approved the early establishment of additional controls of the exportation of iron and steel scrap with a view to conserving the available supply to meet the rapidly expanding requirements of the defense program in this country.

Effective October 15, 1940, all outstanding balances of licenses which have been granted pursuant to the existing regulations of July 26, 1940 for the exportation of No. 1 heavy melting steel scrap will be revoked. On October 16, 1940 the exportation of all grades of iron and steel scrap will be placed under the licensing system.

Under the new regulations which will be made effective on October 16, 1940, licenses will be issued to permit shipments to the countries of the Western Hemisphere and Great Britain only.

Memorandum by the Secretary of State

(Washington, 7 August 28, 1941

The Ambassador of Japan called on the President at the former's request. The Secretary of State was present. The Ambassador expressed his usual appreciation of certain courtesies and considerations shown him and his Government.

He then handed to the Presider a communication from the Prince Premier of Japan to the President of the United States (copy attached). The President read it with interest and complimented the tone and spirit of it.

The President then spoke somewhat as he did at the last meeting a week ago Sunday about the idea suggested by the Japanese Prime Minister of a personal meeting between the President and the Prime analyser at as early a date as possible for the purpose of having a frank discussion of all important affairs existing between the two countries. The President again spoke of the difficulty of going as far as Hawaii and elaborated on the reasons why it would be difficult to get away for twenty-one days. He then turned to Juneau, Alaska, as a meeting place, which would only require some fourteen or fifteen days, allowing for a three or four days conversation with the Japanese Prime Minister. The only point raised by the Ambassador in this connection was that the conversation be held as early as possible.

The Ambassador then handed to the Fresident a communication rom his Government in reply to the communication of the Presient to the Japanese Government, dated August 17, 1941 (copy attached). The Fresident expressed his keen interest to get this reply and proceeded to read it. At two or three stages he stopped to comment briefly and, as he stated each time, study would later, of course, be given to the subject. For example, he remarked that there was nothing in the note to prevent the Japanese from reinforcing their Army and Navy in the Indochina area while the conversations were roing on, even though there was no advance whatever by the Japanese forces. At another point he injected some oral comment to the effect that Japan is in no possible danger from Russia at the present time and he emphasized this very strongly. At still another point he referred critically to the Japanese oil complaints and their baseless nature. He then reminded the Ambassador that under the oil quota allowed Japan by this Government, Japan was in a position to have a number of tankers loaded with oil and transported to Japan if and when it so desired.

At the conclusion of the reading of the communication, the President said to the Ambassador that he could say to his Government that he considered this note a step forward and that he was very hopeful. He then added that he would be keenly interested in having three or four days with Prince Konoye, and again he mentioned Juneau.

Def. Doc. 1400-T-4 The Japanese Embassy to the Department of State No. 235 The Japanese Government has taken note of the regulations governing the exportation of iron and steel scrap, dated September 30, 1940, smending the construction and definition of the term "iron and steel scrap" included in the regulations of ouly 26, 1940, and the announcement of Soptember 25, 1940, to the effect that, under the new regulations, licenses will be issued to permit shipments to the countries of the Western Hemisphere and Great Britain only. The above mentioned regulations refer to the Presidential authority derived from the provisions of section 6 of the Act of Congress approved July 2, 1940, entitled, "An Act to expedite the strengthening of the national defense", thereby suggesting that it was determined to be necessary in the interest of national defense to curtail the exportation of iron and steel scrap. In view of the situation of iron and steel scrap markets, the supply and demand of these materials and the volume shipped to Japan, the Japanese Government finds it difficult to concede that this measure was motivated solely by the interest of national defense of the United States. In the note of the Japanese Ambassador of August 3 the Japanese Government pointed out that the measure announced on July 26, 1940, in regard to the exportation of aviation gasoline, was tartamount to an export embargo as far as countries outside the Western Hemisphere were concerned. Compared to that announcement, the announcement under review may be said to have gone a great function by specifically excluding step further toward discrimination by specifically excluding Great Britain from the virtual embargo. In view of the fact that Japan has been for some years the principal buyer of American iron and steel scrap, the announcement of the administrative policy, as well as the regulations establishing license system in iron and steel scrap cannot fail to be regarded as directed against Japan, and, as such, to be an unfriendly act. The Japanese Government hereby protests against the measures taken by the United States Government in connection with the exportation of iron and steel scrap. (Washington) October 7, 1940 Pages 224-225 Excerpt from FOREIGN RELATIONS OF THE UNITED STATES, JAPAN, 1931-1941, Vol. 11 PURL: http://www.legal-tools.org/doc/d6459a/ 2;

L'emorandum by the Chief of the Division of Far Eastern Affairs (Hamalton)

(Washington), July 30, 1941

I telephoned Mr. Leuchi of the describes to heavy and, referring to his call yesterday and the questions he then raised in regard to cargo abcard the Matura Harm, told him I wished, under instruction, to supplement information communicated by Mr. Welles, to the Ambassador this morning when the Ambassador raised the question of the treatment of cargo on toard Japanese vessels. I referred to the fact that Mr. Welles had informed the Ambassador that no assurances could be given in regard to whether funds would be released or would not be released to cover any cargo landed from such ships and that applications for licenses would be given appropriate consideration if and as they were individually presented. I said that we understood that the Treasury Department was making arrangements whereby Japanese ships, if they did not wish to discharge their cargo, would be granted clearances and permitted to sail with cargo aboard. I told Mr. Iguchi that I understood that the Treasury Department was communicating information to the foregoing effect to the agents or owners of the Japanese steamship companies in this country.

Mr. Iguchi thanked me for communicating the foregoing information to him and said that he would bring it to the attention of the Ambassador.

Later, following conference with Mr. Acheson and conference by Mr. Acheson with Mr. Moley of the Treasury Department, I telephoned Mr. Iguchi and told him that I wished to give him further information on two points: I said that the rirst point was that the provision to the effect that departed ships could, if they desired, enter American ports and leave without discharging cargoes applies only to Japanese ships coming in before next Saturday (August 2), midnight. I explained that ships coming in before that date and desiring to leave without discharging cargoes would be given a reasonable time to leave without discharging cargoes would be given a reasonable time to leave. I said that the second point was that if a Japanese ship's natifiest showed that cargo aboard the ship was destined to an American port and the ship did not wish to discharge that cargo upon arrival at an American port, the ship should correct the manifest at sea to show that no cargo was destined for discharge at an American port. I told Mr. Iguchi also that if the Japanese Embassy wished further particulars on and clarification of these matters, an officer of the Embassy might care to get in touch with the Commissioner of Customs at the Treasury Department.

I went over the foregoing twice with Mr. Iguchi and he said that he understood.

Def. Doc. No. 1400-P-6

Excerpt from Fereign Relations of the United States

Jean: 1931-1941 Vol. II

Page 604

Memorandum by the Ambassador in Japan (Grew)

Tokyo, 7 September 6, 1941

This evening the Prime Minister invited me to dine at a private house of a friend. Only Mr. Dooman and Mr. Ushiba, the Prime Minister's private secretary, are also present. The conversation lastel for three hours and we presented with entire frankness the fundamental views of our we countries. The Prime Minister requested that his statements be transmitted personally to the President in the elief that they eight amplify and clarify the approach through diplomatic channels high had made in Washington through Admiral Tomura. The inclowing is a brief summary of the salient points as they emerged in the course of our discussion.

- 1. Prime Konoye, and consequently the Government of Japan, conclusively and wholeheartedly agree with the four principles enunciated by the Secretary of State as a basis for the rehabilitation of relations between the United States and Japan.
- 2. Prince Konoye recognizes that the responsibility is his for the present regretable state of relations between our two countries but, with appropriate modesty as to his personal capabilities, he likewise recognizes that only he can cause the desirarehabilitation to come about. In the event of failure on his part no succeeding Prime Minister, at least during his own lifetime, could achieve the results desired. Prince Konoye is therefore determined to spare no effort, despite all elements and factors opposing him, to crown his present endeavors with success.
- 3. The Prime Minister hopes that as a result of the commitments which the Japanese Government is prepared to assume as communicated to me by Admiral Toyoda, a rational basis has been established for a meeting between the President and himself. The Prime Minister, however, is cognizant of the fact that certain points may need clarification and made precise formulation, and he is confident that the divergencies is view can be reconciled to our mutual satisfaction, particularly by reason of the favorable disposition on the part of Japanese naval and military leaders who have not only subscribed to his properals but who will also be represented at the suggested meeting. The Prime Minister stated that both the Ministers of War and of the Navy have given their full agreement to his proposals to the United States.
- 4. The reports which the Prime Minister has received from the Japanese Ambassador concerning the latter's conversations with the President and the Secretary have led the Prime Minister to think that the Administration in Washington entertains serious doubts as to the strength of the present Cabinet and that the Administration is not certain that in the event that the Cabinet should adopt a peacef program it could successfully resist the attacks of opposing elements. Prince Konoye told me that from the inception of the informal talks in Washington he had received the strongest concurrence from the reponsible chiefs of both the Army and the Navy. Only today he had conferred with the Minister of War who had promised to send a full General to accompany the Prime Minister to the meeting with the President; the Minister of the Navy had agreed that a full Admiral should accompany the Prime Minister. Prince Konoye added in confidence

that he expected that the representative of the Navy would probably be Admiral Yoshida, a for or Minist of the Navy. In addition the Premier would to accompanied by the Vice Chiefs of Staff of the army and the Novy and other high ranking officers of the armed services who are in entire accord with his aims. He admitted that there are certain elements within the armed forces who do not approve his policies, but he voiced the conviction that since he had the full support of the responsible chiefs of the Army and Navy 1' would be possible for him to put down and control any opposition which might develop among these elements.

- 5. Prince Konoye repeatedly str ssed the view that time is of the essence. It might take half a year to a year to work out all the details of the complete settlement and since resentment is daily mounting in Japan over the economic pressure being exerted by other countries, he could not guarantee to put into effect any such program of settlement six months or a year from now. He does, however, guarantee that at the present time he can carry with him the Japanese people to the goal which he has selected and that should difficulties be encountered in working out the details of the commitments which he may assume, these difficulties can be overcome satisfactorily because of the determined intention of his Government to be to it that its present efforts are fully successful.
- terms the bitter lessons of the past to our Government as the result of the failure of the Japanese Government to honor the promises giver to me by former Japanese Ministers for Foreign Affairs apparently in all sincerity, as a result of which the Government of the United States had at long last concluded that it must place its reliance on actions and facts and not on Japanese promises or assurances. The Prime Minister did not attempt to refute this statement but stressed the fact that his Government now wished to bring about a thoroughgoing reconstruction of American-Japanese relations and he assured me that any commitments which he would undertake would bear no resemblance to the "irresponsible" assurances which we had received in the past and that such contiments if given would be observed. The Prime Minister concluded his presents ion of this point by giving me to understand that given the will be way can be found.
- 7. Prince Konoye stated that should the President desire to communicate any kind of suggestion to him personally and confidentially he would be glad to arrange subsequent secret meetings with me, but he expressed the earnest hope that in view of the present internal situation in Japan the projected meeting with the President could be arranged with the least possible delay. Prince Konoye feels confident that all problems and questions at issue can be disposed of to our mutual satisfaction during the meeting with the President, and he ended our conversation with the statement that he is determined to bring to a successful conclusion the proposed reconstruction of relations with the United States regardless of cost or personal ri.k.

Def. Doc. 1400-Q-4 The Japanese Embassy to the Department of State 21 Since iron and steel scrap classified as No. 1 heavy

melting scrap was placed under export-licensing system on July 26, 1940, permission of the United States Government was obtained up to August 19 of the same year for 99 percent of applications for shipments to Japan.

In the light of this fact, the sudden enlargement of the iron and steel scrap licensing system to include all grades of these materials is hardly explicable from the standpoint of national defense, on which the regulation of September 30, 1940, is surported to be based.

The discriminatory feature of the announcement, that licenses will be issued to permit shipments to the countries of the Western Hemisphere and Great Britain only, has created a widespread impression in Japan that it was motivated by a desire to bring pressure upon her.

The fact that the majority of essential articles and aterials that Japan desires to import from America is placed inder licensing system is causing a feeling of tension among the people of Japan, who naturally presume that the system is intended to be a precursor of severance of economic relations between Japan and the United States.

In view of the high feeling in Japan it is apprehended that, in the event of continuation by the United States Government of the present attitude toward Japan in matters of trade restriction, especially if it leads to the imposition of further measures of curtailment, future relations between Japan and the United States will be unpredictable.

It is a matter of course that the Governments of both Tapan and the United States should endeavor as best they can to reclude such an eventuality. To this endeavor the Japanese lovernment will devote itself and trusts that it may have the full cooperation of the United States Government.

Def. Doc. 1400-Q-5

Memorandum by the Assistant Secretary of State (Acheson)

(Washington), August 1, 1941

Mr. Iguchi called at his request. He told me that the Tatuta Maru would require some cargo to ballast her for the return trip to Japan. I said that I had already been in touch with counsel for the N.Y.K. on this matter and that it would be promptly taken care of within the limits of the export restrictions. He expressed his appreciation.

(At a meeting of the Office of the Administrator of Export Control, Treasury, and State Department officials held in this office, Saturday afternoon licenses were granted for the cargo requested, with the exception that lubricating oil requested was restricted within the specifications empanded by General Maxwell on Saturday. The cargo chiefly consisted of asphalt and a small quantity of cocoa beans and cotton).

Mr. Iguchi asked whether the time limit referred to by Mr. Hamilton within which ships might come in with cargo and leave with the same cargo implied that after midnight Saturday Japanese ships would be detained. I said that it did not. I explained that the time limit referred solely to the agreement that ships outside American ports with cargo might come in with the cargo and leave with it without hindrance from the Treasury. I printed out that this assurance, as a practical metter, was no longer important because of the action of private parties in filing libel suits.

I stated to Mr. Iguchi, as I had been instructed to do by the Acting Secretary, that under present conditions this Government had no intention of interfering with Japanese ships; that such ships might come in, might discharge cargo consigned to American ports, would be granted sufficient supplies and fuel for the return voyage and would be given clearance and departure permits. I cautioned him again that on account of libels filed against cargoes it was not possible to give any assurance regarding the cargoes. I also pointed out that the assurance of freedom of departure was predicated on the continuence of existing conditions. He said that he earnestly hoped that there would be no change in these conditions for the worse.

Press Release Issued by the White House on October 15, 1940

The President on October 10 approved an ect which confers on him authority to requisition arms, ammunition, implements of war, machine tools, and other articles and materials which are needed for the national defense.

Under the Neutrality Acts of 1935, 1936, 1937, and 1939, and under the Export Control Act of July 2, 1940, certain articles and materials needed for the national defense have been subject to the export-licensing system. Since the passage of the last-named act, many applications for licenses have been refused as a result of decisions by the Administrator of Export Control that the proposed exportation would be contrary to the interests of the national defense. The articles or materials for which export licenses have been refused have in many cases already been sold and the title has passed to a foreign purchaser. It has been found that, in some of these cases, purchasers did not desire to sell the article or material in the United States or, because they were acting in a representative capacity, they were not legally in a position to do so. This situation has been particularly acute in the case of some exportations of machine tools. A great many of these tools for which export licenses have been refused are especially needed to meet national-defense requirements.

The President on October 15 issued an Executive order directing the Secretary of Wer and the Secretary of the Navy, acting jointly through the agency of the Army and Navy Munitions Board, to determine the necessity for the requisitioning of any equipment, munitions, or machinery tools, materials, or supplies necessary for the manufacture of munitions, or the servicing, or operation of facilities for the national defense, and to determine whether in any case it is in the public interest to sell, or otherwise dispose of, any of the articles and materials so requisitioned. The administration of the other provisions of the act has been vested in the Administrator of Export Control.

The President at the same time issued the necessary regulations for the carrying out of his Executive order.

As a result of his approval of this act and the issuance of this Executive order and these regulations, the President is assured the use of the critical articles and materials required in the national-defense program which might otherwise be unobtainably.

Ref

Def. Doc. 1400-S-4

The Department of State to the Japanese Embassy

Reference is made to the note dated October 7, 1940, from the Japanese Embassy at Washington, in which objection is expressed by the Japanese Government to the regulations promulgated by the American Government on September 30, 1940, with regard to the exportation of iron and steel sorap, such objection being placed apparently on the ground that the restrictions to be effected by the regulations are discriminatory and are calculated to be injurious to Japan.

As was pointed out in the first paragraph of the Japanese Embassy's note, the regulations under reference derive from the provisions of section 6 of the Act of Congress approved July 2, 1940 entitled "An Act to expedite the strengthening of the national defense". It having been found by the appropriate agencies and authorities of this Government that the restrictions on exportation to be effected by the regulations under reference are necessary in the interest of national defense, the Government of the United States perceives no warrentable basis for a raising of question by any other government, in the circumstances — act of this Government's making — which prevail today in international relations, with regard to the considerations which necessitate the adoption by this Government of these measures of conservation.

Washington, October 23, 1940

Def. Doc. No. 1400-S-6 Excerpt from Foreign Rolations of the United States

Japan: 1931-1941 Vol. II Page 645 The Ambassador in Japan (Grew) to the Secretary of State Substance7 Tokyo, September 29, 1941 - noon. Received 2:25 P.M. The Ambassador reports for Secretar: Hull and "ader 1529. Secretary Welles as follows: (1) In regard to the preliminary conversations taking place at Washington and Tokyo, the Ambassador points out that a review of telegraphic correspondence on this subject since last spring reveals the Japanese Government's efforts, increasing steadily and intensified lately, to arrange a meeting between Prince Konoye and President Roosevelt without further delay. . . . The Ambassador expresses his earnest hope therefore that so propitious a period be not permitted to slip by without a new foundation having been laid with enough stability to warrant a reasonable amount of confidence that the structure to be erected gradually and progressively thereon can and will endure. (2) The Ambassador recalls his statements in the past that in Japan the pendulum always swings between moderate and extremist policies; that it was not then possible under the existing circumstances for any Japanese leader or group to reverse the program of expansion and expect to survive; that the permanent digging in by Japanese in China and the pushing of the Japanese advance to the south could be prevented only by insuperable obstacles. The Ambassador recalls likewise his views that the risks of taking positive measures to maintain United States security in the future were likely to be far smaller than the risks of not taking such measures; that only respect for potential power of the United States has deterred Japan from taking more liber ies with merican interests; and that Japan from taking more liber ies with merican interests; and that Japan's program of forcible expansio could be brought to a halt only by a show of force and by a demonstration of American willingness to use this force if necessary. The ambassador recalls also his statement that if dapan's leadership could be dis redited eventually by such American action, there might take there in Japan ultimately a regeneration of the 18th which would allow Japan to resume formal relations with the United States, leading to a readjustment of the entire problem of the Pacific. (3) The Ambassador suggests that the United States has been fol lowing very wisely precisely this policy which, furthered by other developments in the world, has helped to discredit Japanese leadership, notably that of former Foreign Minister Matsucka. The Ambassador cites as world developments arousing a positive reaction from the United States the conclusion by Japan of the Tripartite Alliance and Japan's recognition of the Wang Ching-wei regime at Nanking, which preceded Germany's attack on the Soviet Union.

Germany's action upset the basis for the Tripartite Pact, Japan having joined the Italo-German Axis in order to obtain security against Russia and thereby to avoid the peril of being caught between the Soviet Union and the United States. At the present time Japan is attempting to correct this miscalculation by getting out of an extremely dangerous position. The Ambassador recalls his -1-PURL: http://www.legal-tools.org/doc/d6459a/ Def. Doc. No. 1400-S-6

reports to the Department to the effect that Japanese foreing policies are inevitably changed by the impact of events abroad and that liberal elements in Japan might come to the top in due course as a result of the trend of events. He considers that such a time has arrived. He sees a good chan s of Japan's felling into line if a program can be followed of world reconstruction as forecast by the declaration of President Respectit and Prime Minister Churchill. American policy--of forecarance, patient argumentation, efforts at persuasion, followed for many years, plus a manifest determination of the United States to take positive measures when called for--plus the impact of world developments upon Japan, has rendered Japan's political soil hospitable to the sowing of new seeds which, the Ambessador feels, it planted carefully and nourished, may bring about the anticipated regeneration of Japanese thought and a complete readjustment of relations between Japan and the United States.

- (4) Certain quarters have advanced the thought -- and no doubt it is prominently in the mind of the United States Government -that at this juncture an agreement between Japan and the United States will serve merely as a breathing spell to Japan. During such a breathing spell, Japan, having successfully untangled itself with American aid from the China conflict, will recoup and strengthen its forces in order to resume at the next fa orable opportunity its expansionist program. This thought cannot be gainsaid with certainty. The same senool of thought also holds that Japan will be forced to re' quish its expansionist program because of the deterioration of Japanese domestic economy and oscause of the threat of finer ial, economic, and seet I collapse due to a progressive intendifying of economic measures by the United States, Great Britain, and the Netherlands against Japan. The Ambaseador adds that should this thesis be accepted as reasonably sound, the position will confront the United States of choosing one of two methods to approach its objective, namely, either the method of progressive economic strangul tion or the method of constructive concillation, not so-called appeasement. The Ambassador sees the second method as the definite choice of the United States Government following the beginning of the Washington preliminary conversations and President Rocsevelt's a ceptance in principle of the Japanese Prime Minister's proposed meeting. Indeed, the Ambassador remarks, the United States has nover departed from its readiness to negotiate on any issues with Japan (see the American note dated Incember 30, 1938), despite the fact that Japan already had embarked at that time on its expansion by force program. He feels that, from the viewpoint of farseeing statesmanship, the wisdom of the American choice seems to be beyond cavil. failure greet the constructive, conciliatory method of approach now or later, there will always be available the other mothed, the applicat in of progressive economic sanctions. In the opinion of the Ambassador, whether the trend of American relations with Japan is for better or for worse, the United States obviously will have to rema : for a long time to come in a state of preparedness. The thought that eventual British victory in the world war will solve lutomatically many problems may, meanwhile, afford whatever degree of encouragement is justified.
- (5) The Ambassador, while admitting that risks will inevitably to involved no matter what course is pursued toward Japan, offers its carefully studied belief that there would be substantial hope at the very least of preventing the Far Eastern situation from becoming worse and perhaps of ensuring definitely constructive results, if an agreement along the lines of the preliminary discussions were brought to a head by the proposed meeting of the heads if the two Governments. The Ambassador mentions his previous appressions of opinion that the principal point at issue between the United States and Japan is not whether the former must call a

Def. Doc. No. 1400-S-6

halt to the expansionist program of the latter, but when. He raises the questions whether the United States is not now given the opportunity to halt Japan's program without war, or an immediate risk of war, and further whether, through failure to use the present opportunity, the United States will not face a greatly increased risk of war. The Ambassador states his firm belief in an affirmative answer to these two questions.

- (6) Certain quarters hold the view that it is altogether improbable under existing circumstances that counteraction will be deliberately taken by Japan in response to any American action likely to be taken in the Pacific which would bring about war with the United States. The Ambassador states his inability to agree that war may not supervene following actions, whether irrational or deliberate, by elements either in Japan or in the United States tending so to inflame public opinion in the other country concerned as to make war unavoidable. He recalls in this regard the cases of the Maine and the Panay.
- (7) The Ambassador stresses the importance of understanding Japanese psychology, fundamentally unlike that of any Western nation. Japanese reactions to any particular set of circumstances cannot be measured, nor can Japanese actions be predicted by any Western measuring rod. This fact is hardly surprising in the case of a country so recently feudalistic. The Ambassador conceives his chief duty to be an attempt to interpret accurately Japanese psychology, and he states that he has aimed to do this in his numerous reports during the last several months and years to the Department. Keeping this thought constantly before him, the Ambassador ver ires at the risk of repitition to advance the considerations set forth below.
- (8) Should the United States expect or await agreement by the Japanese Government, in the present preliminary conversations, to clear-sut commitments which will satisfy the United States Government both as to principle and as to concrete detail, almost certainly the conversations will drag along indefinitely and unrocaductively until the Koneye Cabinet and its supporting elements desiring respectment with the United States will come to the conclusion that the outlook for an agreement is hopeless and that the United States Government is only playing for time. If the abnormal sinsitiveness of Japan and the abnormal effects of loss of face are considered, in such a situation Japanese reaction man and probably will be serious. This will result in the Koneye Government's being disarctited and in a revulsion of anti-American feeling, and this may and probably will lead to unbridled acts. The eventual east of these will not be reckened, and their nature is likely to inflame Americans, while reprisal and counter-reprisal measures will bring about a situation in which it will be difficult to eveid war. The logical outcome of this will be the downfall of the Koneye Cabinet and the formation of a military dictatorship which will lack either the disposition or the temperament to avoid sciliding head-on with the United States. There is a question that such a situation may prove to be more serious even than the failure to produce an entirely satisfactory agreement through the proposed meeting between President Rossevelt and Prince foncys, should it take place as planned. Worded otherwise, the question remains whether it will not prove to be a less serious case for the registations undertaken in good faith to fail of complete success then for the United States to demonstrate its unstillingness to enter any such negotiations.
- (9) The Ambassadon continues by stating that he has been emphatically told on numerous escasions -- and such declarations he considers must be accepted at their face value -- that prior to the

Def. Doc. No. 1400-S-6

proposed Roosevelt-Konoye meeting and formal negotiations it is impossible for the Japanese Government to define its future assurances and commitments more specifically than hitherto stated. The Ambassador explains that one reason for this Japanese position, as given him very configuration, is that former Foreign Minister Matsucka, after his retirement in July, recounted in complete detail to the German Ambassador in Japan the counter of the Washington conversations German Ambassador in Japan the course of the Washington conversations up to that time. Bocause many supporters of Matsuoka remain in the Tokyo Foreign Office, the fear has been expressed that these men will not scruple to reveal to both the fermans and the Japanese extremists any information which would rander the present Cabinet's position untenable. Although certain basic principles have been accepted provisionally by the Japanese Government, the definitions and formulae of Japan's future objectives and policy, as advanced so far during the preliminary conversations, and the statements supplementary to those definitions, are so abstract or equivocal and are open to such wide interpretation that they rather create confusion than clarify commitments which the Japanese Government is ready to undertake. The Ambassador states that at the same time he has been told that Prince Konoye is in a position in direct negotiations with President Roosevelt to offer him assurances which, because of their far reaching character, will not fail to satisfy the United States. The truth of this statement cannot be determined by the Ambassador, who, however, points out that, in regard specifically to Japan's Axis relations, the Japanese Government, though refusing consistently to give an undertaking that it will overtly renounce its alliance member ship, actually has shown a readiness to reduce Japan's alliance adherence to a dead letter by its indication of willingness to enter formally into negotiations with the United States. The Ambassador therefore does not consider unlikely the possibility of Pri te Konoye's being in a position to give President Roosevelt directly a more explicit and setistactory engagement than has already been vouchsafed in the course of the preliminary conversations.

- convertions which he has every reason to regard as cound, American objectives will not be reached by insisting or continuing to insist during the preliminary conversations that Japan provide the sort of clear-cut, specific commitments which appear in any final, formal convention or treaty. Unless a reasonable amount of confidence is placed by the United States in the professed sincerity of intention and good faith of Prince Konoye and his supporters to mould Japan's future policy upon the basic principles they are ready to accept and then to adopt measures which gradually but loyally implement those principles, with it understood that the United States will implement its own commitments pari passu with the steps which Japan takes, the Ambassador does not believe that a now orientation can be successfull created in Japan to lead to a general improving of Japanere-American relations and to the hope that ultimate war may be avoided in the Pacific. The sole way to discredit the Japanese military machine and army is through wholesale military defeat, and the Ambassador sees no present prospect of this. The only alternative (and the only wise one in the view of the Ambassador) is an attempt to produce a regeneration of Japanese thought and outlook through constructive conciliation, along the lines of American efforts at prosent. The Ambassador inquires whether the better part of wisdom and of statesmanship is not to bring such efforts to a head before the force of their initial impetus is lost, leaving it impossible to overcome an opposition which the Ambassador thinks will mount inevitable and steadily in Japan.
- (11) In submitting the foregoing discussion, the Ambassador does so in all deference to the much broader field of view of President Roosevelt and Secretary Hull and in full awareness that the Ambassador's approach to the matter is limited to the viewpoint of the American Embassy in Japan.

D. D. 1400-T-2 "For eign Rolations of the US" Japan - Vol. II(pp2-3) Excerpt from Tolegram The Ambassador in Japan (Grew) to the Secretary of State Tokyo, May 18, 1939-7 PM (Received May 18--10:03 AM) further strengthening of this band is being seriously considered. But if any one should regard Japan, because she had taken such a measure, as joining into the
camp of totalitarian nations in opposition to the
democratic nations, he would surely be misunderstanding
the true intention of the Japanese Government. Japan is not a totalitarian, no more than a democratic, state. She has an original constitution of her own which is centered around the Imperial family, and is based on the spirit of levying (allowing) everything to have its own proper place, surpassing all ideas of antagonism. In joining hands with Germany and Italy we have no other purposes than to combat the destructive activities of Comintern. If the United States, not understanding the true intention of Japan on this point, should bese her future policies on such misunderstanding, it would bring about a deplorable situation not only respecting the relations between the United States and Japan but also in respect of the peace of the world." 4. Arita said to me, and I believe his statement to be accurate, that there is now no substantial opposition in the Government to the proposed arrangement with Germany and Italy as now formulated. At the present moment the Cabinet appears to have weathered the recent storm and to be momentarily secure. I do not, however, believe that this present security can be regarded as permanent because (of) many divergent forces active within the country. 來

お

Memorandum by the Assistant Secretary of State (Berle)

(Washington), November 19, 19/0

The Japanese Charge came in to see me, at his request.

He raised the question of export licenses for machine tools, and submitted the attached very lengthy note. His principal points were:

- (1) They were given to understand that machine tools would be allowed a license for export unless they were needed in the domestic market. Export licenses for certain machine tools were denied. Attempts were thereupon ade to sell them to the domestic market, but it developed that not dy wanted them. Therefore, the Charge thinks the denial of license must be a mistake.
- (2) Certain other mechine tools are manufactured in accordance with specifications which fit Japanese machines, measurements, etc., only. Nobody appears to want to recondition them for American business.
- (3) Certain other machines, according to the Japanese construction of the export licensing order, need no licenses at all. The manufacturers nevertheless requested licenses for them, which were denied. The Embassy wishes licenses for the whole lot.

I confined myself to the comment that I would have the matter looked into.

A. A. B(erle), Jr.

Excerpt from Telegram Grew to Sec. of State.

"Foreign Relations of the US" Japan - Vol. II - pp 58

The Ambassador in Japan (Grew) to the Secretary of State

Tokyo, March 24, 1940 4 PM (Received March 25--1:55 PM)

200. 1. Replying to an interpellation in the Budget Committee of the Lower House yesterday afternoon with regard to the attitude of the United States towards Japan, the Prime Minister is reported to have stated inter alia as follows (our translation of press stenographic record):

"As for the problem of a general embargo this is a serious matter for the country imposing the embargo, (as well as) the country upon which it is imposed. If one false s tep is taken, danger lies ahead for both countries. I do not believe that the United States would risk applying a general embargo upon Japan. However, we must be prepared for any eventuality. The Government is giving every consideration to this point. However, the question of the danger to the two countries through the imposition of an embargo is more than important—it is pure supposition—and I must refrain from giving "yes" or "no" replies to questions based on supposition."

2. Significant portions of a reply by the Foreign Minister on the same occasion follow:

"As for relations between the Chungking Government and the United States the fact must be admitted that the United States, which recognizes the Chiang regime, aids that regime indirectly in various fields of trade. The loan of 25 million dollars and now the loan of 20 million may be placed in that category. The United States is supplying certain types materials to the Chiang regime none of which are supplied to Japan. In other words, indirect aid to the Chiang regime has the effect of a moral embargo. The United States would deny this, but that is the way it appears to Japan.

Def. Doc. 1400-U-4 Memorandum by the Assistant Secretary of State (Berle) (Washington), November 30, 1940 The Japanese Charge d'Affaires came in to see me at his request. He had on his mind the fact that his Government had raised the question of export licenses for certain machine tools, and had called to the attention of the Department the fact that certain kinds of machine tools, notably cutters and grinders, were not listed as requiring licenses. Nevertheless, shipments of these tools had been held up. He now pointed out that in the recent circular to collectors of customs, they were directed not to permit export of tool and cutter grinders until further notice. In other words, though licenses were not required, the collectors of customs were nevertheless not permitted to allow these tools to go forward. I said I would have the matter looked into, but I called the Counselor's attention to the fact that export of these articles was at all times dominated by our needs for national defense. If the Defense Commission felt such tools were needed, they would undoubtedly require them to be licensed; and, as had happened when the Act was first passed, the first step is to hold up shipment pending a more or less careful examination. I could not, therefore, assure him that arrangements would be made prior to December 10 permitting these tools to go forward. I did agree, however, that the Department would look into the matter. Attached is the memorandum handed me by the Japanese Counselor. A. A. Berle, Jr. Page 230 Excerpt from FOREIGN RELATIONS OF THE UNITED STATES, JAPAN, 1931-1941, Vol. 11 PURL: http://www.legal-tools.org/doc/d6459a/ , D LEF OC 1400-U-4

Page 663 Memorandum by the Ambassador in Japan (Grew) /Tokyo, 7 October 7. 1941 When I called upon the Foreign Minister at his request this morning he first informed me that the text of the memorand m handed to the Japanese Ambassador on October 2 by the Secretary of State had been received and was being carefully studied. . . . Admiral Toyoda stated that the private records of the Prime Minister with regard to the September 6 meeting revealed that, although Prince Konoye had "in principle" accepted the four points which the Secretary of State and continuously stressed, the Prime Minister had indicated that some adjustment would be required in the matter of applying the four points to actual conditions. However, a state at that the Prime Minister "fully subscribed" to the four points was contained in the memora dum given to the Japanese Ambas ador on October 2. Admiral Nomura had therefore, in view of this disparity in the records, been instructed to inform the Secretary of State that the phrase "in principle" should replace the words "fully subscribed" in attributing to the Prime Minister the statement, which had been made privately. . . Thus, since an attribution of views to the Prime Minister had appeared in an official document of the United States Government, it had been deemed necessary, in view of the absence of previous comparison between the Foreign Minister and myself of notes relating to what might have been stated by Prince Konoye at the time of his meeting with me on September 6, to clarify the Japanese record of the Prime Minister's statement. (There is no doubt whatrecord of the Prime Minister's statement. (There is no doubt whatseever that the observations of the Prime Minister, which were made
in Japanese and translated by Dooman to me, were correctly and
accurately set forth in my telegram No. 1413, September 6, 10 p.m.,
reporting my meeting with Prince Konoye. The Prime Minister doubtless is referring to his remark made subsequently that "he is convinced that divergences of view can be satisfactorily met" and
that he "realizes that certain points may require elucidation and precision".) J/oseph7 C. G/rew7 PURL: http://www.legal-tools.org/doc/d6459a/

1400-V-2 "Foreign Relations of the US" Japan - Vol. II pp 66 of State

The Ambassador in Japan (Grew) to the Secretary

413. The following is a summary of the press reports of (address by?) Minister for Foreign Affairs at Facific Soc. last night:

Tokyo, June 4 1940--8 PM

(Received June -- 5: 30 AM)

Fundamental policy of Japanese Eapire based upon mission as stabilizing force East Asia. Obviously Japan concerned not only with China continent but also with South Seas areas. Economic relations between Japan and other countries East Asia very close. These countries' territories mutually dependent for prosperity. Japan has deep concern not only for political status quo Netherlands East Indies but also for economic resources, trade, industry, and development those islands. Can nations avoid conflict friction when there exist tariff walls, immigration restrictions, other barriers preventing smooth interchange of goods between nations which are complementally mentary in economic sense? Construction new world order to come after present European war will require basic settlement of this issue.

Repeated by naval radio to Chungking and Peiping.

Def. Doc. 1400-V-4 The Secretary of State to the Japanese Charge (Morishima) The Secretary of State presents his compliments to the Charge d'Affaires ad interim of Japan and acknowledges the receipt of the Japanese Embassy's note of November 19, 1940, in regard to the issuance of export licenses for machine tools. As the Embassy is aware, each application to export a machine tool is examined by the interested agencies of this Government with a view to determining whether or not the tool in question is needed in the United States defense program. In view of the constant and rapid expansion which this program is undergoing, it frequently becomes necessary to revoke a libense already granted, since the tool which it seemed at the time of the issuance of the license could be dispensed with has thereafter been found to be essential to the program. Attention should also be invited to the fact that, even though a particular tool for the exportation of which application is made may not be needed in the defense program, the application may nevertheless be rejected if the manufacture of the tool in question would occupy production capacity needed for the manufacture of other tools which are essential to the program. It should be pointed out, moreover, that other considerations are also weighed by those agencies of the Government responsible for the issuance of export licenses. On December 2, 1939, the President publicly stated the policy of this Government in regard to the export of materials essential to aircraft manufacture to countries the armed forces of which engage in the unprovoked bombing from the air of civilian populations. This policy is naturally taken into consideration by those officers responsible for the granting or rejection of export license applications. The Embassy refers to the revocation of licenses for tools which collectors of customs had previously been informed could be exported without the requirement of a license. The attention of the Embassy is invited to the fact that collectors of customs were informed that no license would be required for the export of these types of tools "until further notice". In view of the fact that the expanding defense program of this Government makes the conservation of machine tool production capacity for its own needs constantly more necessary, collectors of customs were recently instructed that licenses will be henceforth required for the export of additional types of machine tools, including those types listed in the enclosure to the Embassy's note. In regard to the specific case referred to in the second numbered paragraph of the first section of the Embassy's note, the Embassy is informed that this application was received by the Department of State on October 3, 1940, and transmitted to the interested agencies of this Government on the same date. It is understood that a decision in this case has now been reached and that it is being communicated to Mitsubishi Shoji Kaisha. It is also understood that a decision has been reached in the case referred to in the concluding section of the Embassy's note and that this decision also is being transmitted to Mitsubishi Shoji Kaisha. Washington, December 9, 1940 Pages 231, 232 EXCERPT FROM FOREIGN RELATIONS OF THE UNITED STATES, JAPAN, 1931-1941, Vol. 11 PURL: http://www.legal-tools.org/doc/d6459a/

Def. Doc. 1400-W-4

Executive Order No. 8607, Signed by President Roosevelt, December 10, 1940

Pursuant to the authority vested in me by the provisions of section 6 of the Act of Congress approved July 2, 1940, entitled "An Act to expedite the strengthening of the national defense," I hereby prescribe the following additional regulations governing the exportation of:

Iron and Steel

1. As used in my proclemation of December 10, 1940, issued pursuant to the provisions of sections 6 of the Act of Congress approved July 2, 1940, and in these regulations, the terms "iron" and "steel" shall be construed as defined herein:

Iron and Steel:

A. Iron ore B. Pig iron C. Ferro Alloys Ferromanganese Spiegeleisen Ferrosilicon Ferrochrome Ferrotungsten Ferrovanadium Ferrocolumbium Ferrocarbontitanium Ferrophosphorus Ferromolybdenum D. Semi-Finished Products Ingots Billets Blooms Slabs Sheet Bars Skelp Wire Rods E. Finished Products Structural Shapes Steel Piling Plates Skelps Splice Bars and Tie Plates Bars Merchant Concrete Reinforcing Cold Finished Alloy Tool Steel Hoops and Bailing Bands Pipe and Tube Drawn Wire Nails and Staples

Barbed and Twisted Wire

Rij.

The Secretary of State to the Japanese Charge (Morishima)

The Secretary of State presents his compliments to the Charge d'Affaires ad interim of Japan and refers to the memoranda of November 30 and December 4, 1940, of the Japanese Embassy, in regard to the requirement that licenses be obtained for the export of certain machine tools which collectors of customs had been previously instructed might be exported without a license.

The Secretary of State, in reply, invites attention to the fourth paragraph of his note of December 9, 1940, in which he pointed out that this intruction to collectors of customs contained the stipulation that licenses would not be required for the export of these types of tools "until further notice". On November 25, the Department advised collectors of customs that on and after December 10, 1940, all of these types of tools would be subjected to the licensing requirement. Prior to November 25, however, the Department, pursuant to the desires of the Administrator of Export Control with whom rests full authority in matters of this sort, had had occasion to inform both collectors of customs and manufacturers that licenses would be required in certain individual cases for the export of certain specific tools of the types previously exempted, which tools are pressingly needed in the defense program of the United States. These specific instructions, which amended the instructions of July 27, 1940, and, in contradistinction to the instructions of November 25, took effect immediately, account for the course pursued in the individual cases referred to in the Embassy's memoranda of November 30 and December 4, 1940.

Washington, December 17, 1940

Proclamation No. 2451, Signed by President Roosevelt, December 20, 1940

WHEREAS section 6 of the Act of Congress entitled "An Act to expedite the strengthening of the national defense," approved July 2, 1940, provides as follows:

(Here follows the text of the act as quoted in proclamation No. 2413 of July 2, 1940, printed on page 211.)

NOW, THEREFORE, I, FRANKLIN D. ROCSEVELT, President of the United States of America, acting under and by virtue of the authority vested in me by the aforesaid Act of Congress, do hereby proclaim that upon the recommendation of the Administrator of Export Control I have determined that it is necessary in the interest of the national defense that on and after January 6, 1941, the following described articles and materials shall not be exported from the United States except when authorized in each case by a license as provided for in Proclamation No. 2413 of July 2, 1940, entitled "Administration of section 6 of the Act entitled "An Act to expedite the strengthening of the national defense' approved July 2, 1940.":

- 1. Bromine
- 2. Ethylene
- 3. Ethylene dibromide
- 4. Methylamine
- 5. Strontium Metals and Ores
- 6. Cobalt
- 7. Abrasives and abrasive products containing emery, corundum, or garnet, as well as abrasive paper and cloth
- 8. Plastic molding machines and presses
- 9. Measuring Machines
- 10. Gauges
- 11. Testing Machines
- 12. Balancing Machines
- 13. Hydraulic Pumps
- 14. Tools incorporating industrial diamonds
- 15. Equipment and lens for the production of aviation lubricating oil

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of the United States of America to be affixed.

Done at the City of Washington this 20th day of December, in the year of our Lord hineteen hundred and forty, and of the Independence of the United States of America the one hundred and sixty-fifth.

Franklin D. Roosevelt

By the President:
Cordell Hull
Secretary of State

The Japanese Embassy to the Department of State

No. 316

The Japanese Government has taken note of the Proclamation, dated December 10, 1940, by the President of the United States of America, governing the exportation of iron and steel under the provisions of Section 6 of the Act entitled, "An Act to expedite the strengthening of the national defense," approved July 2, 1940, and of the "White House announcement" of the same date, stating in part, that "licenses will be granted for exports to the British Empire and Western Hemisphere, and for the present, so far as the interests of the national defense permit, for exports to other destinations in quantities approximating usual or pre-war exports."

The enforcement of the measure ordered by the President in the Proclamation, especially when carried out in accordance with the policy as announced -- that is, the granting of licenses for exports exclusively to certain countries while subjecting exports to other countries to the considerations of "the interests of the national defense" and to arbitrary quantitative limitations -- constitutes an instance of discriminatory treatment of countries in the latter category, of which Japan, in consideration of the volume of her importation in recent years of the specified commodities, would be one of those most gravely affected.

The Japanese Government, which has had occasion to file protests against discriminations embodied in previous Presidential Proclamations, regulations, and announcements of administrative policy governing the exportation of aviation gasoline and iron and steel scrap, by the Japanese Ambassador's notes of August 3, 1940 and October 8 (7), 1940, respectively, is now constrained to protest, under similar circumstances and for similar reasons, against this fresh measure of discrimination reviewed in the above.

(Washington), December 21, 1940
